RICHMOND, CALIFORNIA, FRIDAY, SEPTEMBER 14, 1928

# Gas Tax May Be Apportioned to Cities

### Revenue Producer Gas Tax Money For Richmond

Richmond's municipal natatorinm continues to bring in the revport of City Manager McVitte, in money collected as "gas tax." his report for August business at A the present time municipalithe big swimming place.

overhead per month totals. If it state and counties. amounts to one-half the gross, the net receipts should soon cancel the indebtedness of a project that was their proportion of the tax. twice defeated at bond elections before the required two thirds vote city attorney. was obtained.

Portunately, the swimming plant is located at the right place, convenient for the motoring public, the main source of revenue.

The plant cost the city complete \$120,000. Patrons who have tried the famous Sutro's baths, and others, claim that Richmond has the best swimming tank of them all.

### Richmond's Monthly Harbor Revenue

In the report of the Parr Terminal Corporation to the city council Monday fight gross receipts at asin's attorneys in presenting the the harborfront were reported as case for the project, \$4480, expenses \$3034, leaving a halance of \$1346, which is divided plicants that the policy of the equally between the city and Parr.

### Kensington School Row Still Active

Kensington school "insurgents" are still obstinate and the 27 junfor highs are still on "vacation," betred from Berkeley schools and too aristocratic" to ride in the buses to the Richmond schools, to whose school district they belong.

The row may terminate in forming another school district for Kensington and Berkeley Park, it is stated by some of the "noisy" ones on that "restricted" billside Albany school board, trumped up all out of gear. California fancy where the yip yip of the coyote may occasionally be heard in the who petitioned the district attor- in Omaha; we pay 50c here at the chaparel as he lopes over the hill ney to investigate the actions of with a chicken or jackrabbit for the board, "blew up" yesterday of which is a sad commentary on his evening meal.

### Death of Former Deputy

Fred W. Johnson, for a number of years a resident of Martinez and served as deputy sheriff, died Sept. 7 at Martinez hospital where he had been under the care of doctors the past year. He was a native of New York and 70 years of age. Surviving are three son , Edwin of Nichols and Fred and Harry of Martinez.

To the fellow who believes that the world never improves we point out the fact that limburger cheese now comes in airtight jars.

## Curtis Pledges Prompt Aid For the Farmer

Agricultural Situation, He Explains, Is of Deep Economic Importance To Citizens

U. S. SENATOR CHARLES CURTIS

Senator Bertis, in his Address of Acceptance, stressed the importance of prompt action on the question of farm aid, "The problem," he declared, "is of deeplessed economic importance to every citizen without regard to ecoupation or political perty." He added the significant thought that "properly its solution is and always should be, nest-pertisan." For the isodership of guch a non-partisan movement, involving the expenditure of hundreds of millions of dollars by the federal governof dollars by the federal govern-ment, he declared that the leader ship should be Hoover's a man well worthy of the party's choice

problem is of despansated accomming importance to severy obtains without repared to his occupation as his political party.

Properly, its solution is and shrays should be, non-artisan. I am convinced that if a shall islat committee of the House and Senate were appointed to study the problem and to find its proper solution, the necessary relief quickly could not would be afforded. The Committee could be assisted in its task by the advice and

experience of the most capable experts on the subject whose services can be obtained.

can be obtained.

It will be remembered that for years we had great trouble with the problem of settling our standard of value. The failure to settle the question had brought forth the Greenback Party, and later the Free Silver party. In 1899, that great and able statesman from Maine, Thomas B. Reed, a point-ed a Committee of Eleven to draw a measure fixing the standard of value. In three weeks the committee value. In three weeks the committee had agreed upon a draft of a bill, and the Gold Standard Act of 1900 was the result. We have had no trouble with that question since then. If such a committee could settle so satisfactorily that great and vexing question, surely a similar committee of able legislators specifically charged with the task could agree upon an agricultural relief plan which would be equally

satisfactory.

The solution will be found, found promptly. Our party piedged itself to the development United States on a basis of ecequality with other industries, to in sure its prosperity and success.

Philosophy of Farming

Encouragement of Agriculture al-ways has been a Republican doctrine. It is a necessary part of our philosophy of government. Agriculture is the basic industry of the country and in the very nature of things will ever be so. Whatever is to the detriment

in the very mature or tange was every be so. Whatever is to the detriment of the farmer is, eventually, to the detriment of all our citizens; his welfare and prosperity are inevitably reflected in the welfare and prosperity of the whole nation.

Many plans for the encouragement of Agriculture have been proposed, and many have been given effect by our party. In the course of my political life every one which in my opinion promised an appreciable measure of sound relief has had my whole-hearted and active support.

Of recent years, two farm measures have been introduced by me in the Senate. Two Democrat members of the House joined in their preparaton and introduction. The first was known as the Curtis-Aswell Bill, it

sels of the United State

Board were reconditioned and p farm products. The Fordney-McCumber Tariff Act carries higher rates of duty on agricultural products than any tariff law in the history of the nation. It has been found that certain of the duties are not high enough to give adequate protection to to give adequate protection to some of the products of the farm, and I believe it is the duty of Congress to provide rates high enough to protect such products against foreign competition. In addition, by this act, the duties have been lowered on most of the articles the farmers buy or they have been put upon the free list.

Appropriations have been made freely to aid the farmers in time of crop failures. The Federal Farm Loan System and the intermediate credit

That effective help has been given to the farmer by the Republican party to the farmer by the Republican party since it took charge on March 4, 1921; is indicated by the statement of the Washington office of the American Farm Bureau Federation. On page one of its Annual Report dated April 6, 1923, there appears the following:

"The passing of the 67th Congress into history marks an epoch in the undertaking of the American Farm Bureaus national legislative campaign, it is not too much to say that the twenty-six laws passed by that Congress, which were initiated and supported by us, are of far more importance to four congress, which were initiated and supported by us, are of far more importance to four congress.

### olden State News of Interest to All

After two years' labor, a group of volumes, each covering one State in-stitution, is rapidly nearing comple-tion and will be placed in the State Capitol for reference, A. R. Heron, director of finance, announced recently. The books contain surveys of all State owned lands, with photographs of each building forming a unit of the State institution to which the volume is de voted being included. Heron estimated

the cost of all the work at \$8000.
Consolidated Aircraft Corporation Oakland has completed plans for passenger service over a loop route from Oakland to Vallejo, Napa, St. Helena, Santa Rosa, Petaluma, San Rafael and Sausalito. The service, according to President J. L. Mayberry will be in operation within 90 days.

# IN ROYAL JEWELS

#### Costly Gems Used to Bedeck Ruling Monarchs.

Washington -- Old Turkish sultans who loved to gaze upon their jewels perhaps would turn over in their graves if the knew that the rew Turkish officials were considering the sale of their precious horde to establish state bank.
"The Turkish crown jewels, for many

years hidden in the green vaults of Constantinople, are among the world's largest collections," says a bulletin from the Washington, D. C. headquar-ters of the National Geographic society. "The Sultans' throne is at mas sive beaten gold, studded with dia monds, rubles and emeralds set in mosaic. It has been appraised at more than \$15,000,000. "Few travelers have ever broken

through the seclusion of the treasure room to see the jewels and only intely have photographers been permitted to take pictures of the collection. There is another throne of ebony and sandalwood, inlaid with mother-of-pearl, rubles, emeralds and sapphires; a toilet set thickly studded with tur-quoises and diamonds; and armor, pistols, saddles, sandals, simitars, turbans, daggers, swords and cames, all bejeweled, not to mention the long strands of pearls as large as cherries, rings, bracelets, anklets, and all sorts of other gorgeously designed jewelry

for various uses.
"One wonders if the old sultans were
thrilled to drink out of the tankard
gleaming with 3,000 dlamonds, or to stick their hands into a salad bowl containing a half bushel of unset stones or a half peck of buttons studded with diamonds. One of the world's largest emeralds, as large as a man's hand, is included in the collection." Tsar's Dazzling Crown.

"Since the Tsar was overthrown the Russian crown fewels now in Moscow, have been in the spotlight with rumors of their sale. Some authori-ties claim the Russian horde to be the vorld's largest. The head of the Tsan must have dazzled with 32,800 carats of diamonds and rows of pearls at royal functions, when he wore his best headdress. There are other regal crowns of magnificent fligree work, artistically set with colored stone

artistically set with colored stones above a base of expensive fur. "The famous Shah diamond which formerly hung in front of the peacock throne when it was in possession of the emperor of India, is in the collection and scattered here and there among the gorgeous array are dia monds as big as walnuts, rubies and emeralds as large as pigeon eggs, in-laid golden plates, bejeweled wall hangings, robes, swords, scepters, pen-dants, canes, staffs, religious emblems, tapestries, and what-nots. The famous Orioff diamond reposes in the handle of Catharine the Great's scepter, "The brightest spot within the grim

gray walls of the Tower of London, it not in London itself, is the jewel roon where the crown jewels of Great Britain are on exhibition. To reach the large glass case which incloses the gems, one has to run the gauntle of guards from the lowly but dignified beefeaters' (Yoemen of the guard) to some of the picked guards of the em-pire. And should a visitor attempt to take one of the gems he likes most, he would find that an unseen tee safe would immediately encase the treasures, the door behind him would ecome fast, and the outer gates of the tower walls would clang shut to avert his escape. Appraisers admit that \$30,000,000 is a low estimate of

the value of the royal jewelry.
"One of the most striking pieces is Queen Mary's crow . Lying on a white satin pillow, it scintillates with many jewels including the famous Kohlnoor (Mountain of Light) diamond. Some of the smaller diamonds were cut from the Cullinan, the largest diamo found. In the rough it weighed 3034%

"Fortunately, the king wears the crown of England but a few minutes during his coronation ceremony. It is a magnificent creation weighing five pounds-somewhat heavy for com-fortable headdress. Its golden form is Prince ruby and beneath it 700 dia-

monds cut from the Cullinan stone.

Carpet of Pearls.

"The princes of India have been collecting jewels for thousands of years and among them are some of the most elaborate displays of gems. It was was taken to Teheran, Persia. Shah Jahan, one of the great Indian moguls daily sat on this solid gold four poster seat, dispensing justice. The monarch's back rested against rubles, emeralds and sapphires which adorned the peacock's tail, while over head was a pearl-fringed canopy. His turban was ablaze with dlamonds, and his fingers literally wrapped in gold and precious stones.

"The carpet of pearls, in the Nuser-bagh palace at Baroda is one of the world famous jeweled creations. It is 8 by 6 feet square. Besides the pearls which form the larger part of the

#### **BOTTLE IS SWEPT** ACROSS THE OCEAN

#### Message Brings Reply From North Sea.

Baltimore, Md.-This is the tale of a bottle, a sengoing wine bottle, fa-vored by an ocean's vagaries and wafted by belping breezes from the Frand Banks to the sandy shores of Schleswig-Holstein.

Schleswig-Holstein.

Strange currents and white-capped breakers carried the bottle thousands of miles through the South Atlantic and the cold waters of the North se and the cold waters of the North sea back again to the German land which thad left months before. On April 17, five days out from Bre-

men, fourteen-year-old Theobald Zahn dropped the bottle into the ocean from North German Lloyd line.

Recently young Zahn received a

necently young Zahn received a postal from a tighthouse keeper at Westerhever, on the shorea of the North sea, saying the bottle had been found, washed ashore by the tide, and the note Theobald had inclosed was plainly decipherable. Theobald, accompanied by his mother, Mrs. Friedg Zahn; his sister, Armanda, eight, and brother, Tony, twelve, left their native home near Munich to Join Mr. Zahn in Baltimore. Baltimore, Off the Grand Banks, Theobald

wrote his note and stoppered the bottle.
"Good-by, Germany—we're going to

America," he wrote on a piece of pa-per in German, and followed it with his name and the address at which he expected to live in the new country. The postal, postmarked Osterhever.

Schleswig-Holstein, and addressed to the "Familie Zahn," caused consider-able excitement in the 700 block North Duncan street. It was signed by Jakob Pauls, the lighthouse keeper, and read:

"Dear F. Zahn: The bottle post w found by my son on the sixth of July on the sands of Westerhever. Kindly answer if you get this card. With best German wishes."

#### Two Mountain Climbers

Die in Alpine Tragedy Vienna.—'Two young Alpinists died and a third was rescued with frozen feet after being marooned for three days and nights as the result of their attempt to scale the sheer sides of Dachstein, the tallests peak of its range in the Austrian Alps. Four

others in the party were unharmed.

The seven young mountain climbers had ascended about 8,000 of the 9,500 feet to the summit when they encoun tered a snowstorm.

They took shelter on a ledge. One youth, named Sturm went mad. His companions roped him to the rock, but he freed himself and disappeared over the precipice.

A rescue party climbed above them and lowered a rope. One by one they were drawn up, but as the fifth was being hoisted the rope broke and he was burled back down the mountainside to his death.

Before a new rope could be knotted together, night shut down and the last member of the party was forced to remain over another night,

### Pendulum in France

**Proves Earth Rotates** Bordeaux, France.- Simple proof produced by making again the famous experiment of the French physicist.

A great pendulum, a fine wire with a weight at the end, was suspended freely from the top of the stock ex-change cupola and made to swing over a graph sheet. The pendulum continued to swing in the same plan while the graph sheet showed that the earth, and naturally the building,

A pendulum 75 feet long was used, each oscillation lasting four and onehatf seconds.

This was the method used by Foucault, who made his test in the Pan theon at Paris.

### Suicide Uses Dynamite

Akron, Ohio.—Placing six sticks of dymmite under his body, Edward Gertensohlager, forty-five, of Wads-worth, near here, lighted them with fuses and blew himself to pieces in a barn at the rear of his house.

### Bans Cigarettes

West Orange, N. J .- Any employee caught smoking cigarettes in Thomas A. Edison's laboratory building will be fired instanter. Notice to that ef-fect, signed by the "wizard" himself, has been posted up.

#### New Diamond Fields Found in South Africa

Johannesburg, South Africa
Diamonds have been found or the coast of Namaqualand, southwest Africa. Dr. Hans Merensky, noted American geologist, had long held a theory that the great Orange river, which drains a large portion of southern Africa and empties into the sea of Namaqualand, into the sea of Namagualand, must have washed down vast quantities of displaced during the centuries. He therefore went prospecting along the Namaqualand coast and was rewarded by finding the seashore dotted with large precious stones that had been swept up again from the sea bed by the waves.

### BARRINGER METEOR BEING EXPLORED

#### Long Enshrouded in Mystery and Indian Fable.

Winslow, Ariz.—Mining operation are under way to explore and deter-mine the actual content on the glant Barringer meteor of northern Arizona, greatest known meteor on earth and hitherto enshrouded in mystery and Indian fable.

The Barringer meteor, 22 miles from Winslow, created a crater a mile across and approximately 1,000 feet deep when it crashed to earth thou

sands of years ago,
It displaced over 300,000,000 tons of rock in the impact.
The crater thus created has been

the center of scientific and geological interest for 50 years, and for the last 25 years various efforts have been made to reach the great shooting star itself and determine its content. Named for Geologist,

The work has been carried on principally by D. M. Barringer, Philadelphia geologist, for whom the meteo was named.

Barringer finally located the main body 1,376 feet from the south rim of the crater. Tests showed it to be approximately 400 feet in diameter and o contain 90 per cent meteoric iron, 7 per cent nickel, .2 ounces platinum and .1 ounces tridium per ton.

The main body is estimated to weigh 100,000,000 tons and the metal con tent to be worth approximately \$50

isted in the ore were disproved by the tests, which showed only so-called miscropic diamond points of no comme cial value.

Actual mining operations just start

ed are under the direction of Bar-ringer and Quincy A. Shaw of Boston ringer and Quincy A. Shaw of Boston of the Calumet & Hecla Mining company. The enterprise is being conducted privately.

Contracts for erecting power plant and fiolst machinery and sinking a two-compartment shaft have been let, and initial construction work is under

Thousands of dollars have been spent in past years in futile efforts to locate the great star and its esti-mated wealth of \$500,000,000 of metals. The United States Mining, Smelt ing and Refining company, one of the largest corporations of its kind in the United States, gave up the attempt after spending over \$100,000. Largest Ever Found.

Barringer, however, has stayed with the problem for over 25 years, and after expending his personal fortun finally located the great ore body with sufficient exactitude to bring to his aid the funds and engineering assistance

of Eastern mining capital. The attempt this time will proceed with more data and directness than any of its predecessors.

The most valuable mineral found in

the diamond drill tests is iridium

worth \$275 an ounce.

The Barringer meteor is the largest of the only three Siderite meteors (containing ore) ever found on earth The other two are the Cape York me teor, weighing 37 tons, discovered by Admiral Peary and now in the New York Museum of Natural History, and the Bacubirito meteor found near Bacubirito, Mex. Neither of the other

### SMART YOUNG DEER

"Daddy," began the young mush deer, who was in the next yard to his father's yard, "won't you tell me more of what people mean when they speak of musk perfume and then call us the

musk deer family?"
"Yes, do explain," said the other deer. "Young Musk Deer has been telling me about it, but he doesn't un derstand as much as he says you must know and understand. "Do tell us, Daddy, "we want to

know more."
"Yes, my son," sald Daddy Musk
Deer, "I will tell you."
"Good," sald the young musk deer.
"In our home in India Daddy Deer
and grown-up son deer hold this cer-

tain sort of perfume which people like o take from us and sell.
"The mothers never carry this per fume, only the vain fathers! And the still more vain sons!"

The young musk deer laughed.

"And as our name has always been the musk deer family they have named

the perfume after us.

"The thing which people think is strange about us is that we have two such long teeth in our upper jaws which reach down below our lower

jaws. "It makes us look almost dog-like! "We haven't horns, and we thrive better in our Indian homes or in our Chinese homes (if we have happened to have lived in China) than in the

"In fact, we're not especially good zoo animals, for we are always re-ceived cordially and yet they can't get

many of us.
"We're not in the least commor

Few of us are here.

"So they are very delighted to see us when they can see us."

"They can't be delighted to see us

when they don't see us," laughed the young musk deer, "Hear the young one talk," said Daddy Musk Deer. "He takes after his smart father, he does."

And the young deer smiled to himself and thought:
"Daddy might have scolded me for being rude, but he likes to say I am

smart and take after him. "That's one time I got out of a So Daddy Musk Deer told all the family history and family ways and the things for which they were fa-mous and the young Musk Deer knew all about his family and his family

home after that. And the people came and admired them for they were rare, indeed, and were considered unusual and interest-

### Histories of Muffins

Suppose you had to record the life histories of hundreds of muffins baked in a long series of experiments to find out how the very best muffins are made-how would you contrive to keep the identity of those good muffins, and not-so-good muffins, and extra good not-so-good muffins, and extra good muffins, and really impossible muffins straightened out? Miss Mary Little, a teacher of Tuscaloosa, Ala., who has been studying mufflus in order to win her master of art degree, solved the problem by finger printing a cross section of each mufflu in her laborawere taken with mimeograph ink, very much as finger prints of criminals are made at police headquarters. No two have the same finger prints. Miss Little has found.

## Satisfy the Cat

Satisfy the Cat
Mother was sick and so father was
forced to scurry around and set forth
what food he could find. David was
much disgusted with the offering and
had not hesitated to say so.
During the mean the family eat
came into the duning room and was
meowing around the table and father
was quite surprised to see David

reach down, get the cat by the of the beck; and hold him deliber over the table. Upon being asked what he meant by such proceedings, David made re-ply: 'I just thought I'd let him see what we had and he wouldn't be so inxious!

### Blind in Cricket Match

Using a ball made of basketwork with a bell in the center, a cricke thatch was recently played in London between the East London Home and the School of Blind Children and the the School of Blind Children and the Royal Normal College for Blind. The blind bowler first measured the pitch by pacing it. Each batsman was lowed two innings.

to be a stone map, holes having been drilled to indicate trails to the four main burying grounds on Santa Cata-lina island.

"It is plausible," Glidden said, "that the strange child burial within the urn and those surrounding it were the result of a natural death of a little girl of high rank and the slaying of 64 attendants and playmates with her. Or they all may have been killed in some religious cereme

"It is even possible the princess may have been given some portion and bur-ied alive. The way the small hands

ied alive. The way the small hands clutched the outer rim of the bowl makes this a possibility."

Wampum inlaid in four broken circles on the rim of the urn with "gates" leading to the four points of the compass lead Glidden to believe the burial place may be near the site of the temple of Chinigchinich.

### Butter Stored for Winter

The Department of Agriculture says that for butter, to be stored for win ter use, pasteurized sweet cream should be used, churned at a low tem perature and the butter washed so that it will be firm and waxy. Rolls or prints of butter should be wrapped in parchment butter paper, placed in a stone crock, and covered with strong brine. Butter should be stored in as cool a place as is available and in a place-free from odors likely to be ab sorhed by the buiter.

Popular trio-three meals a day.

### When Food Sours

Lots of folks who think they have "indigestion" have only an acid condi-tion which could be corrected in five or ten minutes. An effective anti-acid

or ten minutes. An effective anti-acid like Philips Milk of Magnesia soon restores digestion to normal.

Philips does away with all that sourcess and gas right after meals. It prevents the distress so apt. to occur two hours after eating. What a pleasant preparation to take? And how good it is for the awarent Thilks. good it is for the system! Unlike a burning dose of soda—which is but temporary relief at best—Phillips Mik of Magnesia neutralizes many times its volume in acid.

Next time a hearty meal, or too rich a diet has brought on the least discomfort, try-

### **Variations Stamp New Autumn Coats**

Flares, Tunics, Furred Ef fects and Fabrics Play Important Part.

Elaboration upon the silhouette of race and facile movement, introduced early in the year, results in a more complex mode for fall, says a fashion in the Cincinnati Enquirer While the fundamentals remain only slightly changed, the new coats may be easily recognized by diversity of treatment and the variations produced by means of flares, tunics, furred ef fects and fabric working itself.

When straight lines exist in coats they are far from scant lines, and the meven hemline contributes to the nood of gracefulness. Without extremes or exaggeration this exerts a feminine charm to the garment and concentrates upon softening the general outlines.

Fur borders have been revived in hands apparently had clutched the rim of an urn, whose rich ornamentation of wampum bespeaks her royal lineage.

In a circle with the urn as a central results of the side.

Black caracul employed for a full

ing is not always of the spring and summer genre, but very often is the I leneath them was the skeleton of a seven-foot man. A spear blade still working out of a color theme rather was fixed in the rbos.

The sand within the funeral urn all of which is but an indication of

To return to the tunic with its rich fur border in the new way, another striking example of its expression is shown in a coat of plum-colored velvet. The tunic gently falls just below the hem in graning point and draped cuffs compine with its shirred

those of the cape back done in the Vionnet manner. This fur is of black fox flecked with white. Full Circular Flared Skirts.

Of all the new autumn colors and shades of colors, those created in the browns are perhaps the most ap-pealing. There is a charming russet hue, a rich mahogany and a shimmery

opper shade.

Brown came to prominence in the spring to the class of accessories, and gradually built up its season's pres-tige until it reached the evening mode. Smart fashionables have adopted brown tulle and brown chiffor frocks for wear at resort dancing places, and at duncheon time brown afternoon dresses are seen with large hair hats in self color.

Frocks from sheer fabrics, chiffon or tulle, are designed with the ex-tremely full circular flared skirt, and some approach the bouffant style The closely-draped girdle aims to ac ent the flaring skirt and gives the

Three Tones of Green and Three Torres of Blue Are Combined

long slender line of the figure which reaches below the hips. A frock of this type for dancing is in the new

Afternoon dresses of chiffon show interesting shadows of color in the varied brown tones of skirt fullness. Combining the bertha and the cape

is an example of the formal trend.

A peculiarly difficult tone of brown to describe a channel his, a brown containing both gold and pink lights.

This is seen in some avenue shops in nost attractive chiffon evening

dresses.

Evening Lines Droop.

Uneven hemlines achieving the dripping, drooping elegance which now predominates in the evening mode, extend their scope from a mere impression of irregularity to an exaggerated hemline occasionally suggesting a train. The new straight line all around, save for side drapes,

may presage an inevitable change back

Apart from this most important phase of the evening outline, interest is divided between the waist and neck. The molded hip is important and quite necessary for the smart effect of slenlerness. Necklines are varied, some being almost girlishly round or oval, others square or V-shaped, the back of the decolletage reaching extremes

Repeating the skirt movement is the intention of capes and scarf ends for the fluttering slihouette. The vogue of the little jacket as part of an evening ensemble holds the attention of the designer. The jacket has evolved into a very casual little af-fair, cut much on the lines of the fa-miliar cardigan, only made of lace or chiffon with palliettes.

Black chiffon forming a plain skirt in a gown lengthened by petaled side panels, is joined to a low girdled bodice of this fabric in an all-over design of black paillettes, with an

Full Circular Flared Skirt Approach

panying jacket of the latter, typ

Color contrasts in toneful combination assert a new theme. Three tones of green and three of blue are ingeniously combined in an evening gown, exceedingly simple as to bodice with square neckline, suede belt, and angular treatment of its flaring skirt.

Limitless possibilities as to design and fabric seem to hover around the realm of the scarf, and many new ways have been evolved of wearing it. Always a fall and winter accessory, it will be especially fashionable this year. The triangle will be rethis year. The triangle will be re-placed by the square to a great ex-tent, and the short and the long ob-

And the new scarf is in softer cotcolor combined to carry out a design and to blend with a costume or a colt. The new scarf is far more simple in design, the oflong widened into a border of color for contrast only, or like simplicity.

or like simplicity.

Two new ways to wear the square, or the triangle, when it is used, are noted: In one the square is folded diagonally with the points placed over the absulder, the two ends twisted and

the absolder, the two ends twisted and knoted directly at the front, pinned underneath to hold it in position.

When the triangle or folded square is tied closely about the throat and drawn either one end to cascade like a large, one end to cascade like a large, the style is particularly adaptable to wear beneath a coat.

A new Vionnet scarf has one end drawn tightly about the throat with one point over the shoulder, pinned se-curely, and the other hangs free. Accessories for Fall.

Accessories for Fall.

Bags favor the envelope of antelope and calf and evening types are seen not only in the envelope but in pouches agleam with jeweled and sequined patterns on silk brocades.

Flat pouch-shaped bags of very subtly blended tweed calf in beige tones piped with brown are shown with fall traveling costumes. These are not only a neat style, but have a degree

only a near style, but have a degree of smartness rather uncommon.

Feutre renard, or fox felt, is very much the mode of the moment. New hat models employ both sides of this felt with smart effect.

felt with smart effect.
Flowers are not passe. Feit, suede
and leather blossoms are in realistic
as well as modernistic versions.
The kerchief method of decorating
frocks is far from becoming a lost
art. It develops new fancies and isused as a finish for neck, waist,
sleeves and even the hat.

In accessories

In accessories, as in fabrics and styles, points, angles and curves form a part of the latest and most accepted

### Paris Fur Coats Are Cut to Hang Straight

Many fur coats are of a ratter staple type; they are still cut to hang straight despite a perceptible flared movement, but some of the more elaborate models have a wide-flared movement on the sides of the skirt or at the front opening which is sometimes underlined by a bell effect on the forearm. These coats, as well as many evening models, oftentimes present a hemiline that droops slightly at the back.

### The Writing Game

By RING LARDNER

The follin letter recd. from 1 of my admirers in Brazil, Ind., exclaims it

"Dear Sir, I been reading your let-ters in these cols. for a good many mos, and find them very interesting a specially the letters advertising that you was to start a school of that you was to start a school of photo play writeing and in those letters you give your readers a good many hints in regards to how photo plays should be wrote as well as a sample of a 5 reel photo drama. Now no doubt they's a great many people that considered thereself capable of writeins photo plays but couldn't ple that considered thereself capable of writeing photo plays but couldn't afford to take none of the high price correspondents coarses in same and would of always remained a drug in their office or somewheres had you not of came to bat with your low price school.

"Now what I ask is why won't you be as thoughtfull of the people that wants to write short stories like you was to the ones that wanted to write for pictures. I have always feel like I had a gift for writeing short fic-tions but don't know nothing about technics, length of stories and etc. and couldn't dig up the price witch is demanded by the correspondents schools for tuition and etc. It seems to me like you are well qualified to learn people the art of story write-ing even better than other kinds of writeing because I once read a story of yours in a magazine witch you must of been the editor's brother in law but still and all it was printed and you probably got payed for same witch is more than you can say in regards to your efforts at photo plays. So will you be so kind and open up a coarse in short story writeing and give us a idear in these cols, what the secrets and principals is that makes a successful short story fic-tion writer and I am only 1 of thou sands that will be interested and may be subscribe to your school."

The writer to the above is not the only party that has come to me with requests along the same lines, and it begins to look like I would be do-ing a public service was I to comply with their requests along these lines In the first place the average party

has got a magazine editor all wrong has got a magazine editor all wrong witch they usually are. They think he is a man that will give every-body a square deal where as the most of them lets their personal feelings and tempermunt get the best of them. The best rule for a new beginne to follow is to 1st get a idear for a

story and then forget the idear and go ahead and write the story out or dicahead and write the story out or dic-tate it to somebody that has got a good hand writeing or better yet one of these new fangle machines called a typewriter that makes it look all most like print.

Then put a good suggestive title on the story like for inst. "Clara's Calves" and then give it to your family to read, and if they say it reads good why it must be good and the next question is how to ge it before a magazine editor and ge a square deal,

But 1 of the biggest mistakes But 1 of the biggest mistakes a new beginner makes is to send return stamps along with their manuscript as most of the editors is air tight and the minute they see stamps that somebody else has boughten why they can't wait a minute till, they use them, and whist, back comes your manuscript. I remember once before I become a wise grapher that I sent I become a wise cracker that I sen a stamped self address envelope along with a good story I wrote and the old skin filnt shot it back at me pro tem all because he couldn't do nothing else with a addressed envelope with the stamps stuck to it and couldn't bear to see it wasted. Both my sisters read the story I speak of and said it was a pip, and I wished the old Shylock could of heard what they said about him for sending it back.

Well then the only way to get a square deal from a editor is to scrap up a acquaintance with somebody that is all ready in the writeing game and the editor knows who he is and got respects for him and then you have this bird write a letter for you to send along with the manuscript and have him say in the letter that your story is O. K. and the editor is a say if he don't accept because you have got a lot of friends that will stop their subscription if that story comes back.

So much for how to get a square deal after your story is wrote. As for the writeing itself a good many new beginners falls down because they try and wirte their story without the right atmosphere to work in. I can't give no advise on this subject as dif-ferent authors demands different give no advise on the subject as dif-ferent authors demands different working conditions. For inst, they say Rupert H. Bughes can't write a line unlest the water is running in the bathtub and Fannie Hurst won't at-tempt to work without the room is full of sardine cans where as when the editor wants a story out of Mrs. Rinehart they get somebody to stand and snap a rubber bank at her neck. Personly I never feel comfortable at my desk unlest they's a dosen large rats packed on my ft. These inst will give you a idear of how differ-ent tempermunts affects different writers but, as I say, each writer has to choose for himself what temper-munt to have and I might advise you fo try writeing in a public garage where as you might do your best work setting in a cel trap.

THERE is nothing that has ever taken the place of Bayer Aspirin as an antidote for pain. Safe, or physicians wouldn't use it, and endorse it use by others. Sure, or several million users would have turned to something else. But get real Bayer Aspirin (at any drugstore) with Bayer on the box and the week.

#### WHAT DR. CALDWELL **LEARNED IN 47** YEARS PRACTICE

A physician watched the results of constipation for 47 years, and believed that no matter how careful people are of their health, diet and exercise, constipation will occur from time to time. Of next importance, then, is how to treat it when it comes. Dr. Caldwell always was in favor of getting as close to nature as possible, hence his remedy for constipation, known as Dr. Caldwell's Syrup Pepsin, is a mild vegetable compound. It can not harm the system and is not habit forming. Syrup Pepsin is pleasanttanting, and youngsters love it.

Dr. Caldwell did not approve of drastic physics and purges. He did not believe they were good for anybody's system. In a practice of 47 years he never saw any reason for their use when Syrup Pepsin will empty the howels just as promptly.

Do not let a day go by without a howel movement. Do not sit and hope, but go to the nearest druggist and get one of the generous bottles of Dr. Caldwell's Syrup Pepsin, or write "Syrup Pepsin," Dopt. BB, Monticello. Illinois, for free trial bottle.

#### Domesticated

"George," explained George's better half, "gets one night out a week. "My Danny," gurgled the bride of half a month, "gets one night out a week, too, but so far he hasn't taken any of 'em!"

### RECOMMENDS IT TO OTHERS

Lydia E. Pinkham's Vegetable Compound Helps Her So Much

Cleveland, Ohio.—"I sure recommend Lydis B. Pinkham's Vegetable Compound to any woman in the condition I was no weak and run-down that I could hardly stand up. I could not cat and was full of misery. A friend living on Arade Avenue told me about this medicine and after taking ten bottles my

weakness and nervousness are all gone. I feel like living again. I am still taking it until I feel strong like before. You may use this letter as a testimonial."—Mas. Shizaserer Toso, 14913 Hale Ave., Cleveland, Ohio.

W. N. U., San Francisco, No. 37-1928.

### Unbreakable Corner

The ice combine, as we gather from the news, still has a grip on the Arctic regions that the most determined Esregions that the most determined Es-kimo housewife isn't going to be able to shake off.

### Of course you're going to hear Hoover and Smith

THANKS to radio, they expect to talk directly to evoter in the United States. Where is the family can afford to be without at good radio set in this minteresting of Presidential years?

When Smith and Hoover go on the air, you can count on Atwater Kent Radio. Its reliability, its power, its range, its simplicity of operation, as well as its clear tone, have made it the leader everywhere. It comes from the largest radio factory, where workmanship is never slighted. It is not an experiment. You don't have to take it on faith. It is the fruit of twenty-six years' manufacturing experience—six years

Nearly 1,700,000 owners know that the name Atwater Kent on radio means the same thing as "sterling" on silver. Whether or not your home is equipped with electricity, there is an up-to-date Atwater Kent model to carry on the Atwater Kent tradition of giving the finest reception at the sowest price.

The Atwater Kent electric sets require no batteries. A cord from the compact, astin-finished cabinet plugs into any convenient lamp socket and the current costs only about as much as the lighting of one 40-west lamp.

Knew What Ailed Him
"Mammin, I've got a stomach ache,"
hald Peggy, aged dvo.
"Tant's because you haven't had
hay "tinch "yet," answered l'egg,'s
mother. "You'r stomach is empty.
You would feel better if you had
something in it."
That afternoon the minister called,
and is the course of conversation remarked that he had been suffering nil
day with a severe headachie.
"That's because it's empty," said
Peggy brightly. "You'd feel better if
you had something in it."—Children,
the Magazine for Parents.

### "Jerked" Beef

"Jerked" in the phrase "jerked beef "Jerked" in the parase "Jerked beet for ment" is not the regular past par-ticipial form of the verb. "Jerk." It is a corruption of the Peruvian Indian wood "charqui." Jerked ment is ment that has been cut into thin sheets and that has been cut into thin sheets and strips and hung upon a framework at poles to dry in the wind and sun. This wife a favorite method of cirring baffalo ment among the Indians of the Breat plains. When the ment was fully "jerked" it was folded up and put into rawhide bags and kept for use in the winter.—Putafinder Magnetice.

Bobby and Tom lived next door to each other. Bobby was outside rid-ing his scooter when Tom came out-

"No," answered Bobby, hesitatingly, from went on and Bobby ran into the

house.

Nicholas Murry Butler seems to e as thoroughly convinced that iquor cannot be abolished by law as he is that war can be abolished by law.

They've cut off the sleeve of the dress, taken out the neck and chopped the skirt off about in the middle, so what's left of it doesn't really seem worth the fuss that's made over it. - Philadelphia In

We read a lot in the metropolitan press, on the finance pages, about 'call money'' and we wonder where it is. We have called it nany a time, and it never answers.

Of course it's nice to be a proessional athlete but it's our opin on that they dont live any longer than the fellow who got his exer ise chopping wood or digging a onnty ditch.

If you want to realize how old ou are getting please remember that there are millions of boys and girls now old enough to vote who never heard of Coin's Financial School."

In some cases a man's time is so sinable he has to move his home loser to the golf grounds -Dallas

Some people save money. Others ave a coed daughter on vacation. Newark, O., Advocate.

The telephone operators in New ork will now tell you the correct me if you call central but it costs on a nickel. Another proof of the ld adage that time is money.

When you think of the number si'k hose flished around on the treets every day, don't you ever onder how the overworked sitkorm keeps up with the demand.

#### When Chess Was Put

Under Churchly Ban As to how cless was introduced into western and central Europe little in really known, and still less about its advent into this country. Some say that chess was brought into Europe at the time of the trusques, the theory being that this time nor the trusques, the theory being that this time warriors learned to play it at Constantinople, but this has been disproved.

More probable it is that the Spaniards received the game from their Moslem conquerors, who had learned it from the Persians, who in their turn had been initiated into it by the Hindus, while the Italians acquired chess from the Dyzantines.

chess from the Dynantines.
It seems that chess was known in Italy before the first Crusade, for

Italy before the first Crusade, for there is extant, says Colonel Whitten, in the Nineteenth Century, a curious letter from the cad mal archishop of Ostia to I spe Alexander II, written about 16th bearing on the game.

The cardinal had imposed a pepance on a bishop whom he had found diverting himself with chess, and male in the cardinal putter to the pope the cardinal quotes the language of reproof he had used to his erring subordinate? Was it right, I. say, and consistent with thy duties, to sport away thy evenings amidst the vanities of chess and defile the hand which offers up the body of the Lord, and the tongue the body of the Lord, and the tongue which mediates between God and man, with the pollution of this sacrilegious game?"

## What is due the public

THE Bell System recognizes the public requirement for a constantly extending and improving telephone service. Last The number of local calls not completed on the first attempt was reduced by 5 per cent. The average time for handling toll and long distance calls was reduced from 2 minutes to 11/2 minutes.

During the last five years the Bell System spent \$1,800,000,000 on additions and improvements of its plant.

There is equally a public requirement for safety of principal and carmings of the stock of the American Telephone and Telegraph Company—the parent company of the Bell System. Since its incorporation in 1885 it has never missed paying a regular dividend to its stockholders, who now number more than 420,000.

The very nature of the telephone business necessitates a single interconnected system. The American Telephone a single interconnected system. The American Telephone and Telephone service as a public trust. It is fundamental in the policy of the company that all earnings after regular dividends and a surplus for financial security be used to give more and better service to the public.
